Estimated Cost of Living including Lodging
1400 BRL / Month

Working Environment: Field work

Working Hours / Week: 30.0

The student will be involved in research activities within projects aimed at studying the contamination and toxicity of groundwater and/or superficial water collected from coastal water bodies. This will include field sampling, sample processing, and the development of toxicity tests with aquatic invertebrates. I intend to discuss with the candidates the possibility of developing a short study within my current projects. They will also be invited learning about the other activities developed in the laboratory by graduate, master and PhD students.

ADDITIONAL INFORMATION
