Working Hours / Week: 40.0

Project Title: Enhancing Medical Treatment through AR/VR-Based Gamified Applications

Detailed Project Description: This project offers virtual reality (VR) environments that simulate safe, controlled settings for exposure therapy, stress management, and relaxation. By incorporating gamified elements, such as achieving milestones in mindfulness or completing challenges in cognitive-behavioral therapy (CBT), the therapy becomes more engaging and interactive. Additionally, augmented reality (AR) features provide real-time feedback, reminders, and rewards for consistent participation in treatment plans. The app tracks patient progress and offers incentives, such as virtual rewards or community recognition, to maintain motivation and encourage ongoing commitment to their treatment.

Outcomes of the Project:

1. Game application
2. Research paper

Expected Results: A project report with a plagiarism level of less than 12 percent.

## ADDITIONAL INFORMATION

The option of Work from Home is available for this offer. In the case where the intern chooses to work from home, there will be no stipend provided. However, in the case where the intern opts to intern at the employer's address, a stipend will be provided for the period of internship.

**Deadline for Nomination - 15-Mar-2025**
